Projects

FloraNourish – Smart Plant Monitoring System — ESP8266, Python, ML, MQTT, HTML, CSS, JavaScript, React

- Built an IoT pipeline using ESP32 sensors to capture 4+ real-time parameters (soil moisture, temperature, humidity, light) and stream data to Firebase via Wi-Fi.
- Trained a Python ML model on historical crop data to predict irrigation needs, reducing estimated water waste by flagging over/under-watering patterns.
- Developed a JavaScript/HTML dashboard to visualize live sensor data and remotely trigger smart irrigation controls.

Portfolio – My Personal Portfolio — HTML, CSS, JavaScript, React, Tailwind CSS

- Designed and developed a fully responsive personal portfolio website to showcase projects, skills, achievements, and contact details.
- Built interactive UI components using React and Tailwind CSS, improving user experience with modern layouts, animations, and smooth navigation.

Sales Performance Dashboard — Power BI, Sample Superstore Dataset

- Developed a 3-page interactive Power BI dashboard analysing sales trends, profitability by sub-category, and operational insights across 9,994 records; identified loss-making categories and discount-profit correlation using 15+ visualisations.
