EDUCATION

KIET - Deemed to be University, Ghaziabad

Bachelor of Technology in Computer Science and Engineering
Second-Year Undergraduate

Sept. 2024 – May 2028 (Expected)

CGPA: 9.38

St. Paul's Sr. Sec. School, Etah

Class XII – CBSE (Senior Secondary Examination)

2023

95%

St. Paul's Sr. Sec. School, Etah

Class X – CBSE (Secondary Examination)

2021

99%

PROJECTS

FloraNourish – Smart Plant Monitoring System — ESP8266, Python, ML, Firebase, Tailwind CSS, JavaScript, React (July 2025)

- Developed an IoT pipeline using ESP32 sensors to capture 4+ real-time parameters (soil moisture, temperature, humidity, light) and stream data to Firebase via Wi-Fi.
- Trained a Python ML model on historical crop data to predict irrigation needs, reducing estimated water waste by flagging over/under-watering patterns.
- Developed a JavaScript/HTML dashboard to visualize live sensor data and remotely trigger smart irrigation controls.

Driver Drowsiness Alert System — Python, TensorFlow, Keras, OpenCV, Streamlit (Feb 2026)

- Developed a real-time driver drowsiness detection system using MobileNetV2-based CNN classification achieving high-accuracy state identification from webcam input.
- Optimized visual feature extraction by leveraging transfer learning with a pretrained MobileNetV2 model for efficient visual feature extraction and binary classification.
- Designed an interactive Streamlit UI with real-time camera monitoring and drowsiness status visualization using OpenCV.

Lost & Found Platform — React, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB

- Developing a modern Lost & Found platform for schools and colleges to help students report, search, and recover lost items through an organized digital system.
- Designing a responsive interface with item listings, category-based filtering, search functionality, and personalized user dashboards.

TECHNICAL SKILLS

Languages	C, C++, Python, JavaScript, Java (Basics)
Frontend	React.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3
Backend APIs	Node.js, Express.js, Flask, REST API Design, JWT Authentication, Postman
Databases and Cloud	MongoDB, MySQL, Firebase, AWS (Certified Cloud Practitioner)
AI / ML	Machine Learning, Computer Vision (OpenCV, Mediapipe), NLP, Scikit-learn, Keras, Numpy, Pandas
Generative AI	LLM API Integration, Prompt Engineering, Retrieval-Augmented Generation (RAG) basics
Tools and Analytics	Git/GitHub, Tableau, Power BI, MS Excel, Arduino IDE, Canva, AutoCAD
CS Fundamentals	Data Structures and Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming using Java, Computer Networks

EXPERIENCE

Decode Labs Internship — Artificial Intelligence (AI) Intern

(June 2026 - July 2026) (Remote)

- Develop and evaluate machine learning models in Python end-to-end — data preprocessing, feature preparation, model training, and performance evaluation — under industry mentor guidance.
- Follow industry-standard engineering practices including Git-based version control, code reviews, and structured documentation across AI project deliverables.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** — Amazon Web Services (AWS) (May 2026)
- **NPTEL: Human Computer Interaction** (IIIT Delhi) (April 2026)
- **NPTEL: Programming with Generative AI** (IIT Madras) (Oct 2025)

ACHIEVEMENTS

- **Finalist, HackVega 2.0** – National Engineering Hackathon by HirePro & MyCareernet (June 2026)
- **Academic Brilliance Award** – First Year (Nov 2025)
- **Finalist, Navonmesh 2025** - AKTU AIda Challenge (June 2025)
- Solved **1000+ DSA problems** across various platforms with active participation in coding contests

EXTRACURRICULAR

- **Member of Innogeeks**, Development Club of KIET (Oct 2024 - Present)
- **Student Coordinator**, NSS Club of the KIET (Dec 2025 - Present)
- **Graphics Team Coordinator**, NSS Club of the KIET (Jan 2026 - Present)
